

# INFORMATION REPOSITORY

## INDEX

The Information Repository (IR) is a file that contains all information used by the U.S. Army Corps of Engineers (USACE) and the Environmental Protection Agency (EPA) to make its decision on the selection of a response action. Its purpose is to provide the public access to site-related information so that they may make informed comments on the selection of a remedy.

### Information Repository File - OU1, Contaminated Soils

The documents related to Operable Unit 1, Contaminated Soils, are labeled in the lower right hand corner. The index number on each document begins with "OU1".

- Supplemental RI/FS Former Nebraska Ordnance Plant, Operable Unit 1, Mead, Nebraska, Chemical Data Acquisition Plan, SEC *Donohue*, February 21, 1992. OU1-1
- Supplemental RI/FS, Former Nebraska Ordnance Plant, Operable Unit 1, Mead, Nebraska, Health and Safety Plan, *Donohue*, February 21, 1992. OU1-2
- Supplemental RI/FS, Former Nebraska Ordnance Plant, Operable Unit 1, Mead, Nebraska, Field Investigation Plan, *Donohue*, February 21, 1992. OU1-3
